

যদি আপনি **Kali Linux** কে **VMware Guest** হিসেবে ব্যবহার করেন:

### ✅ Step 1: Install VMware Tools

```
sudo apt update
sudo apt install open-vm-tools open-vm-tools-desktop -y
sudo reboot
```

### ✅ Step 2: Enable Shared Folder

1. VM > Settings > Options tab > Shared Folders
2. Enable Shared Folders
3. Add folder path (like `C:\Users\You\SharedFolder`)
4. Enable "Always Enabled"

### ✅ Step 3: Access Folder

Shared folder সাধারণত `/mnt/hgfs/` এ mount হয়।

```
cd /mnt/hgfs/
ls
```

### ✅ Step 2: Create Mount Point (যদি না থাকে)

```
sudo mkdir -p /mnt/hgfs
```

---

### ✅ Step 3: Manually Mount the Shared Folder

```
sudo vmhgfs-fuse .host:/ /mnt/hgfs -o allow_other

ls /mnt/hgfs
```

Next Time when you will start kali then :

```
cd /mnt/hgfs/  
sudo vmhgfs-fuse .host:/ /mnt/hgfs -o allow_other  
cd  
cd /mnt/hgfs/
```
